

Press Release

MakoRabco Expands Product Offerings to Include Pre-Engineered Metal Building (PEMB) Solutions for Diverse Construction Projects

Industry-leading expertise in self-storage construction now available for other types of projects with new PEMB packages.

Carlsbad, CA, November 20, 2024

MakoRabco, a trusted leader in self-storage design and construction, is excited to announce an expansion of its product line with Pre-Engineered Metal Building (PEMB) solutions tailored for a wide range of building applications. Known for delivering high-quality self-storage facilities, MakoRabco is now making its PEMB expertise available for projects beyond self-storage, including commercial and industrial structures, with needs for clear span and rigid frame buildings.

“We’ve built a strong reputation in the self-storage industry through a commitment to quality, innovation, and customer satisfaction,” said Angie Guerin, Executive Vice President at MakoRabco. “Our goal is to bring the same dedication to excellence to the broader construction market by offering PEMB packages that give our general contractor and developer clients the versatility and strength needed for diverse building applications.”

MakoRabco's PEMB solutions are designed to offer flexibility and customization to meet the demands of various projects. With years of experience in delivering robust, cost-effective solutions for self-storage, the company's PEMB packages offer durable construction options that can stand the test of time.

By expanding its product range, MakoRabco aims to serve general contractors and developers looking for trusted, high-quality PEMB solutions and capitalize on the company's expertise in metal building construction. The company's PEMB offerings provide optimal cost-efficiency without compromising on quality, designed to help clients meet their project goals across different industries.

"We're excited to support our clients in the construction industry," Angie Guerin added. "This expansion allows us to continue strengthening our valued partnerships while bringing the value of our PEMB expertise to even more sectors."
